

HVAC Installation Technician

Job Description

Robies has an immediate opening for an HVAC Installer. This position is for a skilled, motivated, efficient individual. Experience in the HVAC trade is required. The ideal candidate has knowledge and training in any of the following area: ductwork fabrication and installation, refrigerant piping, gas piping, hydronic piping, control wiring, generator installation, ductless installation, furnace installation, water heater installation, condensing unit and heat pump installation. The ideal candidate has experience in more than one of these areas. Any trade licenses are a huge plus.

For the right candidate, Robies will offer a signing bonus and hourly rate increase.
